

Every Gemway product part(scissor structure, platform, beams, post etc.) are made by advanced CNC machine, which make every lifter parts extremely precise and can cut max 20 mm thickness steel structure and error will be less than **three-thousandths of a millimetre**.

Therefore we can made the precise scissor lift structure and boom lift, beams, and even the small needed parts, this will be a great improve for our products quality.

This Gemway do is only for one aim, to make every detail perfect of our product .
