

GEMWAY Gemway Powder Coating Process

PERFECT PAINT SPRAYING

Gemway paints its machines with a paint-spraying device. This device doesn't only increase production efficiency but also speeds up production delivery times and ensures perfect coats of paint on each and every machine.

Gemway ensures precision so that every detail of our products is perfect.

Gemway products will be used on this powder-coated house after it has been shot blasted.

Powder-coated House

Powder-coated House (Interior)

Gemway ensures precision so that every detail of our products is perfect.

Powder-coating

VS

Manual Painting

Powder-coating machines increases durability and enables an even spray.

Manual painting is often uneven and easy to flake off.

More beautiful, more efficient. Safe for our workers to breathe.

Causes serious harm to operator's health; not environmentally friendly.

Gemway wants to make every detail perfect – this is the intrinsic value behind each of our products.

Powder Coating Effect

PERFECT PAINT SPRAYING

Powder-coating Effect

VS

Manual Painting Effect

Powder Coating improves the adhesive power of steel surfaces and increases fatigue and corrosion resistances.

Gemway wants to make every detail perfect – this is the intrinsic value behind each of our products.
